Hire Smarter, Not Harder

AI is reshaping the labor market, and your clients are racing to keep up. If they want to effectively expand their pipelines, they need better workflows and more efficient systems. The good news is, those tools already exist. Here's how they work.

How AI Recruiting Works

AI-powered recruiting tools automate the most time-consuming parts of the recruiting process. Your clients can stop manually sourcing candidates, screening resumes, and emailing each applicant individually. When you automate the busywork, recruiters have time to prep for interviews and build real relationships with future team members.

Paycor Smart Sourcing

Our powerful recruiting software works like a virtual sourcing assistant. It taps into job boards and a database of millions, quickly connecting HR with active and passive candidates. The platform automatically curates a list of the best options, then reaches out to top matches on your clients' behalf.

Key Features

Paycor Smart Sourcing empowers your clients to:

- Source active and passive candidates automatically
- Connect with top talent at scale
- Generate job descriptions in minutes using AI
- Connect seamlessly with Paycor Recruiting and all major ATS and CRM systems

How Paycor Helps

As part of our unified HCM platform, Paycor Smart Sourcing seamlessly connects with onboarding, payroll, and performance management. Give your clients the tools they need to support every employee, from hire to retire.
