With Paycor, Time and Attendance Are on Your Side

Payroll accuracy starts with proper timekeeping.

When your clients track employee hours manually, they run the risk of expensive errors, disengaged employees, unnecessary labor costs, and major compliance issues. The right HCM software not only tracks worker hours; it also gives time back to business leaders so they can focus on driving results.

Software That Keeps up With the Times

Modern time and attendance platforms do far more than record punches. **Paycor's solution integrates directly with Payroll, giving managers real-time visibility into labor data.** Employees get access to flexible self-service options, driving engagement and retention. Approved hours flow directly into payroll processing, **saving time for everyone on the team.**

Time and Compliance Updates Wait for No One

Wage and hour laws are always shifting. No tax on overtime is a game-changer, and state-specific regulations are on the rise. Automated time tracking keeps your clients ahead of the curve, so they can focus on running the business instead of solving compliance problems.

Key Features

Paycor Onboarding empowers your clients to:

- Track hours across web, mobile, and physical time clocks
- Flag missed punches and overtime exceptions
- Streamline communication with self-service tools for employees
- Feed approved hours directly into Payroll

How Paycor Helps

Paycor's Time and Attendance Software is purpose-built for modern teams. Whether your clients manage office staff, remote employees, or frontline, deskless workers, automated time tracking keeps everyone accountable and engaged.
